WORK EXPERIENCE

Dataesg Solutions LLC
React Developer (Remote)

Greater Boston
Nov 2021-Feb 2023

Semantic Search Engine & Investment Product Search Projects

Objective – Developed semantic search engine and intelligent investment product research tool for Private Equity and Investment Technology firms to power users' search ideas in natural language. The Application hunts down the most relevant results based on domain-adapted machine learning model output that is delivered to the user through user-friendly app.

- Built client-facing web application to power users' searches using React.js
- Reduced the complexity of state management by using Redux Toolkit's built-in utilities for immutable updates and memorization
- Collaborated with machine learning developers to integrate custom trained ML models in the application

Cretrix LLC
React Developer

Yerevan, Armenia
June 2023-Dec 2024

- Collaborated closely with UI/UX designers to develop intuitive and user-friendly web applications using Figma, ensuring seamless communication and alignment between design and development teams
- Worked closely with dev team on Git to daily commit code updates and manage version control for web development project
- Successfully integrated GraphQL into the front-end architecture, allowing for more precise and flexible data queries. This implementation optimized the communication between the client and server, resulting in improved application performance.

EDUCATION

Russian Armenian (Slavonic) university
Bachelor's Degree in International Relations

Yerevan, Armenia
2015-2019

Armenian Code Academy (ACA), Tech 42
Advanced JavaScript

Yerevan, Armenia
2021-2022

Physmath school after Artashes Shahinyan
High school

Yerevan, Armenia
2011-2015

QUALIFICATIONS

Software: Javascript/Typescript, React.js, GraphQl, Redux/toolkit, GIT

Languages: Armenian(native), English(fluent), Russian(fluent), Spanish (beginner.)

Professional skills:

- Over 3 years of experience developing high-performance React applications with a strong emphasis on GraphQL for efficient data handling and integration.
- Expertise in state management using Redux and Redux Toolkit, creating seamless workflows and scalable solutions.
- Skilled in translating client requirements into user-centric, visually compelling applications, consistently delivering quality solutions on time.
